

# Maximizing the availability and value of Information

Discover: Effective and Efficient Storage Solutions

**Unrivalled** breadth and depth of intelligent management solutions tailored to your information-on-demand needs.

**Resilient** business continuity solutions.

**Advanced** virtualization across disk, tape and SAN.

**Lower** TCO (total cost of ownership) to help reduce financial risk.

**Unmatched** interoperability and support for heterogeneous multivendor environments.

**Cloud** ready Solutions.

In today's rapidly evolving business environment, making effective use of information is an increasingly challenging task. The pace of change is so fast and volume of information so great that Information Technology (IT) systems can become choke points rather than enablers of efficient exchange.

Our **Storage Solution** offers storage solutions to help you manage and grow information as effectively as your other business assets.

**Tech9labs** tackles critical storage issues for large and small companies – in practically every industry – with everything from strategy formulation to implementation.

### Storage Professional for you

Tech9labs offers you a customized session discover and enable you to maximize your current environment and decide your future roadmap.

Together, we map your needs to the solutions which best suit your business, technical and financial requirements.

- A thorough review of your storage architecture
- Define and assess business impact
- Best Practices: management, backup, disaster recovery & business resiliency
- Options: consolidation, compression, deduplication and storage virtualization
- Address regulatory compliance concerns
- Future roadmap

Tech9labs can tackle your Compute demands in ways that are scalable, cost effective, secure and resilient.

The goal is to provide open, vendor-neutral solutions that fit your technology profile - and address short and long term business objectives.

**We delivers the depth and breadth of intelligent storage solutions and expertise to help you reliably bring information to people in a costeffective way.**
